## 카드 요약 / 당시 확인 내용

China Daily reported on May 27 that Nanjing Agricultural University and more than 30 industry institutions launched Green Shield, China's first open - source LLM for crop protection. The report said the model was trained on a 2.5 billion - token corpus and connected to the national pesticide registration database to block non - compliant chemical recommendations. That makes the system important not just for diagnosis, but for compliance - aware pesticide decision support.
