카드 요약 / 당시 확인 내용

Biotalys announced on April 27 that Florida granted the first U.S. state registration for EVOCA, its protein - based biocontrol product. The company added that California's Department of Pesticide Regulation is progressing its review and that approval is projected for the second half of 2026. That matters because a Florida registration creates an early commercial beachhead while California remains the major validation market for broader U.S. adoption.
