카드 요약 / 당시 확인 내용

The Western Producer reported on June 2 that a CropLife International study found it still takes 11.4 years and about US\$307 million to bring a new crop protection product to market. That is an improvement from the 12.3 - year average reported for 2014 - 2019, but it remains an exceptionally long and expensive innovation cycle. The article also notes that major firms have been shifting more spending toward biologicals.
