카드 요약 / 당시 확인 내용

Fertilizer prices for fall 2026 application are running 16% to 24% above prior - year levels, according to University of Illinois farmdoc analysis, as the Iran conflict continues to weigh on farm budgets through higher natural gas and logistics costs. Illinois anhydrous ammonia reached \$915.50 per ton, up 23% from 2024. The analysis notes that retail fertilizer prices remain relatively sticky even as international benchmarks retreat, meaning declines at the wholesale level take time to reach growers and fall budgeting should not assume immediate relief.
