카드 요약 / 당시 확인 내용

CropLife reported on July 16, 2026 that Rometron established WEED - IT USA, a new subsidiary in Wellington, Colorado, to support demand for WEED - IT precision spraying and spot - spraying technology in the United States. WEED - IT uses real - time optical weed detection so growers apply herbicides only where weeds are present. The company said the system can reduce chemical usage while maintaining weed control, lowering input costs, improving operational efficiency and supporting sustainability objectives.
