카드 요약 / 당시 확인 내용

Global Agriculture reported on July 15, 2026 that Syngenta entered a strategic partnership with Groundwork BioAg to commercialize mycorrhiza - based biological products and soil carbon solutions. Syngenta will market Groundwork BioAg's mycorrhizal technology under its own brand, initially targeting corn, soybean, cereals and sunflower production in Latin America and Europe, with plans to expand distribution. Groundwork BioAg will manufacture products, manage supply, provide digital tools and oversee the carbon program. The offering is designed to improve nutrient uptake, strengthen crop resilience, enhance soil health and let farmers generate carbon - credit income.
