카드 요약 / 당시 확인 내용

AgriBrasilis reported in its July 14, 2026 crop protection and nutrition weekly update that Anvisa approved, in compliance with court decisions, toxicological evaluations for products including bifenthrin, flumioxazin, azoxystrobin + difenoconazole SC, isoxaflutole 750 g/kg WG, mesotrione 480 g/L SC, S - metolachlor 960 g/L EC and technical - grade etoxazole. The same update said CropLife Brasil is developing a plan with the Ministry of Agriculture, Anvisa and the Federal Revenue Service to increase inspections of imported crop protection products at ports including Santos, Rio Grande and Itajai. From January to May 2026, China accounted for 72% of the value and more than 90% of the volume of Brazil's imports of generic formulated products.
