## 카드 요약 / 당시 확인 내용

Michigan State University Extension published its Michigan vegetable crop report on July 15, 2026. The report included crop - protection field guidance, including use of a residual grass herbicide with a compatible broadleaf residual herbicide, along with crop - specific pest, disease and crop - condition observations. The report illustrates how vegetable growers make weed, pest and disease management decisions together during midseason, with label compatibility, residual activity, crop safety and scouting all affecting product choices.
