카드 요약 / 당시 확인 내용

The Grower reported on July 16, 2026 that Canada's Pesticides Regulatory Directorate approved an Emergency Use Registration request for Captan 480 SC fungicide for control of anthracnose on field peppers in Ontario only. The approval is effective June 2, 2026 until June 1, 2029. The request was submitted by the Ontario Ministry of Agriculture, Food, and Agribusiness and sponsored by the Ontario Fruit and Vegetable Growers' Association. A temporary MRL of up to 1.5 ppm for captan has been established on field peppers in Canada, and exporters should ensure destination - country tolerances before application.
