카드 요약 / 당시 확인 내용

The European Commission has adopted a new regulation introducing mandatory digital labelling for plant protection products (PPPs). Commission Regulation (EU) 2026/1123 mandates that all PPPs carry physical labels plus digital labels accessible via data carriers (QR codes), with freely accessible information without registration, identical content between formats, and enhanced features including larger fonts, translations, voice assistance and searchable content. The framework adds dedicated bee pictograms and standardized risk mitigation phrases. Implementation begins 1 January 2028, with a final deadline of 1 January 2030; manufacturers, distributors and growers must update packaging, regulatory documentation and digital information systems.
