카드 요약 / 당시 확인 내용

Syngenta Group China today announced plans to partner with McDonald's China and McCain China in building a more resilient and sustainable potato supply chain in China. The three signed a Memorandum of Understanding at the 4th China International Supply Chain Expo to transform local potato farming through sustainable practices and smart technologies, addressing soil health, customized crop stewardship, precision fertigation, integrated pest management, and intelligent field monitoring. Syngenta will leverage its agronomic inputs, digital farming solutions, and Modern Agriculture Platform (MAP) technical service centers. 'Agriculture today faces mounting pressure from yield and resource constraints, requiring a shift from volume expansion to resilience building,' said SU Fu, President of Syngenta Group China.
