카드 요약 / 당시 확인 내용

16 June 2026, Cairo: BASF Agricultural Solutions has launched Efficon[®] in Egypt, introducing a new insecticide for the control of key sucking pests in high-value crops. The active ingredient is dimpropyridaz (Axalion[®] Active) at 120 g/L SL, classified in IRAC Group 36 with a new mode of action, targeting piercing-sucking insects including whiteflies and aphids in vegetables and potatoes. Efficon rapidly stops insect feeding, reducing virus transmission and crop damage, and is compatible with Integrated Pest Management programs.
