## 카드 요약 / 당시 확인 내용

The World Bank projects its fertilizer price index to rise more than 30% in 2026, driven by an expected ~60% jump in urea prices. Urea climbed above US\$850 per tonne in April, its highest in four years. The Middle East accounts for nearly a quarter of global urea exports through the Strait of Hormuz, making the chokepoint the key swing factor. DAP is seen up ~6% and MOP ~12% in 2026.
