카드 요약 / 당시 확인 내용

The European Chemicals Agency (ECHA) officially classified trifluoroacetic acid (TFA) as toxic to reproduction (Category 1B) on June 11, 2026, concluding it may damage the unborn child and is suspected of damaging fertility. TFA is a breakdown product of nearly all PFAS pesticides, and under EU pesticide law substances that contaminate groundwater with toxicologically concerning metabolites cannot remain authorized or be re - approved. PAN Europe is demanding an immediate ban on all PFAS pesticides that release TFA.
