## 카드 요약 / 당시 확인 내용

CropLife Australia announced on July 23, 2026 that it released the official 2026 update of Resistance Management Strategies for fungicides, herbicides and insecticides. The strategies were reviewed by expert committees and national and international specialists, and are intended to help farmers and environmental land managers maintain the long-term effectiveness of crop protection products. The guidance supports responsible product rotation and stewardship, while labels and APVMA permits remain the controlling instructions.
