카드 요약 / 당시 확인 내용

The Guardian reported on July 25, 2026 that Syngenta will cease selling paraquat in Australia after new APVMA regulations made continued sale commercially unviable. The article said paraquat is banned in more than 70 countries and has been linked to Parkinson disease concerns, while APVMA said evidence was insufficient to confirm a direct link under regulated use. New restrictions include phasing out backpack sprayers, lower maximum application rates and stricter PPE. Generic alternatives will still be available.
