카드 요약 / 당시 확인 내용

The International Organization for Standardization provisionally approved 'bipyribicyclone' on August 22, 2026 as the common name for a new herbicide active ingredient developed by Qingdao KingAgroot Chemical Compound Co. The compound is 3 - (5' - chloro - 3' - fluoro - 6 - methoxy[2,2' - bipyridin] - 5 - yl) - 4 - oxobicyclo[3.2.1]oct - 2 - en - 2 - yl methyl carbonate (CAS 3104861 - 57 - 3). Objections may be submitted through February 22, 2027; absent challenges, the designation becomes an approved ISO common name in ISO 1750 nomenclature. In the same week ISO also provisionally approved KingAgroot's fungicide name 'flupropamid' and insecticide name 'dipyrisulfyl', giving the Chinese innovator three new common names across herbicide, fungicide and insecticide categories.
