카드 요약 / 당시 확인 내용

Maria Fernanda Caceres Sanabria, regulatory manager at Registros Paraguay S.R.L., explained that pesticide registration in Paraguay takes 6 to 15 months and costs approximately US\$2,500 in government fees, with annual maintenance around US\$395. SENAVE (Servicio Nacional de Calidad y Sanidad Vegetal) is the sole agency responsible for evaluating and approving registrations. Foreign companies must have legal representation and an incorporated entity registered with SENAVE. Studies conducted within the COSAVE region may be accepted for certain categories, while chemical products require local trials depending on usage history in Paraguay. New evaluation procedures for innovative products are in development. The article notes potential Paraguay export growth of up to 27% under a Mercosul - EU agreement.
