카드 요약 / 당시 확인 내용

Syngenta Group reported H1 2026 sales of \$12.2 billion, down 2% year-on-year (-7% at constant exchange rates), primarily due to reduction of the low-margin grain trading business in China. EBITDA rose to \$2.4 billion, up 2%, with EBITDA margin improving 0.9 percentage points to 19.5%, driven by focus on higher-margin businesses, innovation and AI leadership. Crop Protection sales reached \$6.6 billion, up 4%, on strong demand for high-value innovations including PLINAZOLIN, ADEPIDYN and TYMIRIUM, with nearly 900 registrations and label extensions secured. Seeds sales were \$2.5 billion (+1%) with Brazil Field Crops up 18% and North America down 13% on reduced corn acreage. ADAMA sales were \$2.1 billion, flat, with EAME up 9% and China down 23%. Syngenta Group China sales fell 15% to \$2.5 billion while branded formulations grew 15%. Under new CEO Hengde Qin, appointed August 1, 2026, the company remains focused on accelerating innovation delivery and digital capabilities.
