Syngenta announced that Princep Liquid herbicide will become available in October 2026, offering the same formulation turf managers have used for preemergent control of troublesome weeds including Poa annua, burclover, lawn burweed, common and mouse - ear chickweed, and henbit. Princep Liquid can be used on bermudagrass, centipedegrass, St. Augustinegrass and zoysiagrass with excellent safety from fall through spring, and is tank - mix compatible with Barricade 4FL, Monument 75WG, Tenacity and Reward herbicides. 'Princep Liquid gives turf professionals a dependable option for managing a variety of broadleaf and grassy weeds in warm - season turf,' said Lane Tredway, technical services manager at Syngenta Professional Solutions. Stephanie Schwenke, turf market manager, said Syngenta is excited to make Princep Liquid available again as a trusted component of turf weed management programs.
