카드 요약 / 당시 확인 내용

DTN's retail fertilizer price survey for the third week of August 2026 showed prices lower for the fifth consecutive week. UAN28 led with a significant 8% decline to \$436 per ton, while urea (\$664), 10 - 34 - 0 (\$715), anhydrous (\$943) and UAN32 (\$458) were slightly lower. DAP (\$916), MAP (\$959) and potash (\$495) were slightly higher. All nitrogen fertilizers tracked averaged \$625 per ton. Compared with one year earlier, seven of eight fertilizers were higher: anhydrous +24%, DAP +8%, 10 - 34 - 0 +7%, MAP +6%, urea +5%, UAN28 +4%, potash +2%, with UAN32 the only decliner at -5%. DTN noted ongoing U.S. - Iran tensions affecting the Strait of Hormuz and fertilizer transit, with the UN offering neutral facilitation for shipments, and Morocco's OCP returning phosphate fertilizer shipments to U.S. markets.
