카드 요약 / 당시 확인 내용

The European Commission is overhauling the framework for placing biopesticides and biocontrol products on the market, with new EU rules to fast-track approvals. The Commission proposed an unlimited-period approval mechanism with a selective, risk-based re-evaluation model, prioritizing biological and low-risk plant protection products, shifting away from the systematic renewal cycle of typically up to 10-15 years. Between 1 February 2019 and 1 February 2025 about 82% of approved active substances in the EU were biocontrol agents, almost half of them microorganisms.
