카드 요약 / 당시 확인 내용

Nutrien reported second quarter 2026 nitrogen sales volumes of 2.253 million tonnes, down from 3.017 million tonnes in Q2 2025. Potash volumes decreased slightly to 3.943 million tonnes from 3.989 million tonnes, while phosphate volumes increased to 590,000 tonnes from 543,000 tonnes. CEO Ken Seitz stated that the phosphate market today is completely unsustainable and that significant changes must occur. Nitrogen volume declines resulted from reduced corn acreage, the prior year large fall applications, Western Canadian planting delays, facility idling and purchase delays due to market uncertainty.
