카드 요약 / 당시 확인 내용

The Weed Science Society of America commended the U.S. EPA for proposing six new herbicide registrations to help farmers combat difficult - to - control weeds. The registrations include diflufenican, epyrifenacil, florpyrauxifen - benzyl, isoxaflutole, topramezone, and trifludimoxazin, with tolerances established for crops including corn, soybean, wheat, cotton, and rapeseed. WSSA president Ian Burke stated that timely access to effective and safe crop protection tools is important for sustainable agriculture. The EPA published final rules on June 30, 2026, with public comment periods ranging from 30 - plus to 60 days. WSSA framed the actions as aligning with an Executive Order promoting regenerative agriculture and farm resilience through science - based regulatory decisions.
