카드 요약 / 당시 확인 내용

On 30 June 2026 in Mumbai, BASF introduced two crop protection solutions in India. Melyra fungicide combines mefentrifluconazole (200 g/l) and pyraclostrobin (200 g/l) for use on cotton, groundnut, soybean, chilli and tomato. Inveris Gold insecticide blends afidopyropen (50 g/L) and abamectin (25 g/L) to combat aphids, jassids, whiteflies, thrips, mites and leaf miners in vegetable crops including chilli, tomato, brinjal, cucumber and okra. The launches strengthen BASF's fungicide and insecticide offering for Indian growers across high - value horticultural and field crops.
