China's Xingfa Group reported Q1 (to 31 March 2026) revenue up 3.1% to RMB7,451.7 million (~\$1,076.2 million), but parent net profit fell 17.4% to RMB256.6 million. Crop protection profitability improved as conditions recovered, though lower phosphate ore volumes and rising fertilizer costs weighed on earnings, and operating cash flow deteriorated to a larger outflow.
