카드 요약 / 당시 확인 내용

FMC announced on July 8 that it submitted the first global regulatory dossier for rimisoxafen to the U.S. EPA. The U.S. submission covers corn, soybean, sunflower and selected pulse crops. FMC said rimisoxafen is the first herbicide active ingredient classified by HRAC as a dual mode of action, Groups 12 and 32, and was developed through more than a decade of biology research and over 1,000 field and greenhouse studies. The company highlighted activity on Palmer amaranth and waterhemp and positioned the submission as part of a next-generation weed-resistance pipeline.
