카드 요약 / 당시 확인 내용

SDSU Extension said EPA recently approved a Section 18 Emergency Exemption label for Vertento Insecticide for use on sunflowers against red sunflower seed weevil in South Dakota. The exemption is effective July 15 to August 31, 2026. SDSU previously tested isocycloseram and observed 100% mortality in a 2022 laboratory assay, while field trials greatly reduced the percentage of damaged seeds compared with untreated controls. South Dakota has confirmed resistance to pyrethroid active ingredients including lambda - cyhalothrin, esfenvalerate, cypermethrin, deltamethrin and beta - cyfluthrin, with 2025 field failure reports for malathion.
