카드 요약 / 당시 확인 내용

Investigate Midwest reported on July 9 that EPA ’ s new dicamba rules may not stop drift damage to crops and trees. The story, produced with Harvest Public Media, focuses on dicamba use in soybean systems and the herbicide ’ s tendency to move away from treated fields. It notes that the pesticide has been subject to court bans and continued debate over whether label restrictions can adequately protect neighboring crops, trees and rural communities. The article underscores ongoing uncertainty for growers and retailers relying on dicamba - tolerant soybean programs.
