카드 요약 / 당시 확인 내용

EPA ’ s agriculture news and alerts page, updated July 10, lists the release of the U.S. Fish and Wildlife Service draft biological opinion for the insecticide carbaryl for public comment. EPA describes carbaryl as a pesticide used on a variety of crops, including field vegetables and orchard crops. The action fits EPA ’ s broader process of aligning pesticide registrations with Endangered Species Act obligations, which can affect label restrictions, mitigation measures and product stewardship requirements.
