카드 요약 / 당시 확인 내용

Biotalys announced on September 2, 2026 that the California Department of Pesticide Regulation (CDPR) has granted state registration for EVOCA, the company's first protein - based biofungicide, following successful completion of the public consultation process in July. EVOCA is a protein - based AGROBODY biocontrol that helps safely control the fungal diseases Botrytis (grey mold) and powdery mildew for fruit and vegetable growers. It received EPA approval in December 2025 and state approvals in Florida and California in 2026, while regulatory review is ongoing in the European Union. The approval paves the way for the regulatory submission of EVOCA NG, the next - generation version containing the same active ingredient, expected to be Biotalys' first commercial biofungicide with a planned U.S. launch in 2029 and Europe in 2030, targeting a combined market of around USD 1.1 billion.
