카드 요약 / 당시 확인 내용

Living Roots, a Thailand - based agtech startup co - founded by Avika Narula and Abhi Agarwal, specializes in high - performance bio - fertilizers manufactured from waste products designed to replace chemical inputs. The company received its second investment from Epic Angels following a 2025 bridge round backed by angel investors, and operates in Thailand, India, Indonesia and West Africa with dedicated science and field teams. Its AI platform, Hypha, accelerates product development by adapting formulations based on crop type, soil condition and growth stage, compressing nine months of scientific work through computer - based testing before field trials. Living Roots is expanding from bio - fertilizers into biopesticides and herbicides to create a suite of products that work well together for comprehensive crop management, addressing farmer reliance on mismatched products from different suppliers, while exploring farmer - facing AI advisory tools.
