카드 요약 / 당시 확인 내용

OCP North America, a subsidiary of Morocco's OCP Group, and CHS Inc., the largest farmer - owned cooperative in the United States, announced a proposed joint venture to build and operate a new phosphate fertilizer production unit in Louisiana. The project carries an investment of up to \$450 million and would be the first facility of its kind constructed in the United States since 1984, located inside Cornerstone Energy Park, an 800 - acre industrial site in Waggaman, Louisiana. Once operational, the facility is expected to have capacity of more than 1 million metric tonnes of phosphate fertilizer per year, potentially reducing U.S. dependency on imported phosphate - based fertilizer by more than 48%. The project is expected to create approximately 60 permanent jobs and 500 construction jobs, with a total impact of 924 direct and services - support jobs. Subject to project and funding approvals, construction is expected to take up to 24 months.
