카드 요약 / 당시 확인 내용

China's ICAMA approved four new biopesticides including the country's first RNA - based pesticide, a double - stranded RNA product from Silicon Gene that silences target genes to control tobacco mosaic disease (65% technical and 2.5% SC). It also registered seaweed - derived polysaccharides from France's Goemar for the first time (90% technical, 45 g/L) as plant resistance inducers against grey mould in strawberry and powdery mildew in cucumber.
