카드 요약 / 당시 확인 내용

Albaugh has received registration from the U.S. Environmental Protection Agency (EPA) for Pyraxol SC herbicide (EPA Reg. No. 83100 - 91), expanding the company's herbicide portfolio with a pyroxasulfone - based product for residual weed control. Pyraxol SC belongs to Group 15 of the herbicide classification and contains pyroxasulfone, a preemergence active ingredient used for residual control of annual weeds, including resistant biotypes. The active ingredient is effective at relatively low use rates compared with several other Group 15 herbicides. The herbicide is designed to control annual grasses, sedges and key annual broadleaf weeds, including waterhemp and Palmer amaranth. According to Albaugh, pyroxasulfone is also active against weed populations resistant to ACCase inhibitors, ALS inhibitors and glyphosate. Pyraxol SC can be used across crops including corn, cotton and soybeans, and is expected to be available through authorized Albaugh distributors, subject to final state registrations.
