카드 요약 / 당시 확인 내용

Five Indian crop protection companies - Crystal Crop Protection, Rallis India, Dhanuka Agritech, PI Industries and Godrej Agrovet - have come forward through CropLife India to urge the Government of India to include a limited, time-bound Protection of Regulatory Data (PRD) framework in the Pesticides Management Bill 2025. The proposed protection period is five years from first registration of new molecules and new uses. Introducing a new molecule costs 40 - 50 crore rupees over 6 - 8 years, while a generic applicant faces costs of about 75 lakh rupees. India loses 10 - 35% of annual agricultural output to pests, weeds and diseases, worth roughly 2 lakh crore rupees, and has about 380 registered molecules versus around 1,200 used globally. Major markets already provide data protection: the US 10 years, the EU 10+5 years and Brazil 10 years. CropLife India chairman Ankur Aggarwal said every molecule a company brings in early belongs to the whole industry once the window closes.
