카드 요약 / 당시 확인 내용

India extended its special subsidy support for diammonium phosphate through the rabi season as import costs remain elevated. The government will pay 3,500 rupees, approximately \$41, per metric ton to importers and domestic producers, covering port handling, bagging, marketing, transport and dealer margins plus compensation for price fluctuations. Recent deals have priced DAP in the mid - \$910s to high - \$920s per metric ton CFR, while the breakeven threshold for importers is roughly \$510 per metric ton CFR, meaning current prices create substantial losses. The rabi season runs October to March and accounts for roughly half of India's annual grain output. India is the world's largest DAP importer, and the subsidy extension signals the government expects elevated phosphate costs to persist into early 2027, prioritising food security by maintaining affordable phosphate supplies for the critical rabi crop season.
