카드 요약 / 당시 확인 내용

EPA established an exemption from the requirement of a tolerance for residues of Bacillus amyloliquefaciens strain AT - 332 in or on all food and feed commodities when used in accordance with label directions and good agricultural practices. Gowan Company, in cooperation with SDS Biotech K.K. (c/o Landis International), submitted the petition under the Federal Food, Drug, and Cosmetic Act. The rule became effective September 15, 2026; objections and requests for hearings must be received on or before November 16, 2026 under 40 CFR part 178. The exemption eases the path for biological crop protection products based on the new microbial strain.
