카드 요약 / 당시 확인 내용

At its September 15, 2026 Investor Day, Corteva's seed spin-off Vylor confirmed that Xpedite, its proprietary hybrid wheat system, will launch in late 2027 with a staged rollout beginning with Hard Red Winter wheat, followed by Soft Red Winter in 2029 and Hard Red Spring in 2030. The technology has been shown in trials to work in 100% of wheat germplasm tested, enabling more rapid genetic gains and commercial-scale seed delivery. Xpedite delivers roughly 10% more yield using the same land and resources and up to 20% more under water-stressed conditions, and could double the annual rate of genetic gain in wheat by 2040. Vylor anticipates hybrid wheat will make wheat the third pillar of its business alongside corn and soybeans, generating \$500 million in revenue by 2035 and \$1 billion by 2040 including licensing.
