카드 요약 / 당시 확인 내용

The ISO 1750 Maintenance Agency provisionally approved ioflanilide on September 2, 2026 as the standardized common name for a new meta - diamide insecticide developed by Shandong Chengchuang Lanhai Pharmaceutical Technology (CAS 3062078 - 55 - 8). The chemical designation is 5 - chloro - N - [2 - fluoro - 3 - [[2 - iodo - 4 - [1,2,2,2 - tetrafluoro - 1 - (trifluoromethyl)ethyl] - 6 - (trifluoromethyl)phenyl]amino]carbonyl]phenyl] - 2 - thiophenecarboxamide. Interested parties have until March 2, 2027 to raise objections, particularly regarding trademark conflicts; absent issues, the name receives final approval and inclusion in a future ISO 1750 edition. In the same week, FMC's new fungicide isofenpyracarb also received provisional ISO common name approval, continuing a run of new active ingredient naming from Chinese and US innovators.
